SUMMARY

I use my expertise in **Django, DRF, and Next.js** to build **scalable and secure web applications** that help businesses **deliver fast, reliable, and user-friendly digital experiences**. By combining strong backend architecture with efficient frontend integration, I help organizations **turn complex technical challenges into smooth, high-performing solutions** that grow with their users

KEY PROJECTS

Fullstack Developer (Portfolio Project) – Corper Connect – A social media platform Live Demo | Backend | Frontend
Self-Directed Project |May 2025 – Oct 2025

- Built a **social media platform** using **Django, DRF, PostgreSQL, and Next.js**, enabling real-time posts and chat.
- Designed and deployed backend APIs, real-time chat (WebSockets), and SEO-friendly Next.js frontend.
- Managed deployment with **Docker**, **Nginx**, and **Let's Encrypt**, ensuring performance and scalability.

Fullstack Developer (Portfolio Project) Family Record Live Demo | GitHub (Backend) | GitHub (Frontend)

Self-Directed Project |Jan 2025 – May 2025

Tech Stack: Django, DRF, PostgreSQL, Next.js, Tailwind CSS | Tools: Docker, Nginx, Gunicorn, CI/CD

- Developed a **family record management system** with authentication and live data updates.
- Integrated **Dockerized** backend and frontend, hosted on VPS with **Nginx** and **Gunicorn**.
- Improved query performance and applied **role-based access control** for secure user data.

Fullstack Developer (Portfolio Project) Kwiseworld · Live Demo | Backend | Frontend

Self-Directed Project | Aug 2024 – Jan 2025

- Created a **full-stack e-commerce platform** using Django REST Framework and Next.js.
- Optimized backend performance and implemented secure checkout flow with authentication.
- Built a fast, SEO-friendly frontend with **Server-Side Rendering (SSR)** and static generation.

Software Developer (Portfolio Project) – Tree Database · Live Demo · | GitHub

Self-Directed Project | Dec 2022 – Dec 2023

- Built a tree catalog web app using **Django**, integrating **location mapping** and **image uploads**.
- Added keyword and GPS-based search for tree species identification.

Profile Automation – Web Scraping & Automation Tool · GitHub · **Tech Stack:** Python, Selenium

- Created a **Python automation tool** for **secure login and user profile data extraction**.
- Implemented **error handling and retries** for robust performance.
- Exported **structured data in CSV format** for further analysis.

SKILLS

Backend Development: Python, Django, Django Rest Framework (DRF), PostgreSQL

Frontend Development: HTML, CSS, JavaScript, Tailwind CSS, Next.js, jQuery

Automation & Scripting: Python, Selenium, Web Scraping

Other Tools & Technologies: REST APIs, Git, Web Security, Docker, Nginx, Gunicorn
